About

Founder of Telebux, a sales layer for web3 teams with a CRM built in. Previously at Streamflow Finance, first as a web developer and then in customer success and business development for Web3 clients. Hands-on with the Solana ecosystem and strong at turning customer feedback into product decisions. Based in Serbia.

Experience

Founder, Telebux — Aug 2026 – Present

- Building Telebux, a sales layer for web3 teams that run leads through Telegram, Slack and email, with a CRM built in rather than a CRM alone.
- Shipping product end to end.
- Running outbound and customer discovery directly, and sharing progress publicly through daily build-in-public updates on X.
- Supported by Superteam Balkan; featured in a SaaS Browser case study.

Business Development / Customer Success, Streamflow Finance — Mar 2025 – Aug 2026

- Managed customer success and business development for Web3 clients, including sales calls, partnership discussions and customer onboarding.
- Led product demos, technical support and onboarding calls to help clients successfully adopt Streamflow products.
- Provided customer and technical support: helped users navigate the platform, resolved their issues, and escalated bugs to the engineering team for fixes.
- Worked closely with Product and Engineering to translate customer feedback into platform improvements and feature enhancements.

Junior Web Developer (Freelance), Multichain Advisors Inc. — Aug 2022 – Dec 2023

- Built landing pages for the company.

Intern / Junior Web Developer, Streamflow Finance — Mar 2022 – Sep 2023

- Coded the design for ~30 landing pages in the Astro framework and boosted the company's SEO ranking.
- Took part in several design discussions for landing pages.
